Management Discussion of Fund Performance

Investment Objective and Strategies

The Fund invests primarily in equity securities of Canadian and foreign companies.

The Fund will invest its portfolio such that it generally falls within the Canadian Focused Equity investment strategy category. As such, the Fund generally invests at least 50% and less than 90%, of its equity portfolio in securities domiciled in Canada. The Fund will invest no more than 49% of its assets in foreign securities, with the majority of these foreign securities expected to be domiciled in the United States. In addition, the weighted average market capitalization of the Fund’s equity portfolio is generally considered mid to large capitalization.

The portfolio advisor’s investment approach follows a company focused investment style, seeking companies with unique competitive capabilities, strong management, good growth prospects and a solid financial position. Emphasis is placed on paying reasonable prices for cash flow growth that companies in the portfolio are expected to achieve. The portfolio advisor expects the Fund to generally hold between 20 and 40 equity positions, diversified across business activities and/or sectors.

Risk

The Fund is suitable for investors seeking long-term capital appreciation with a tolerance for medium risk. General risks of an investment in the Fund are detailed in the simplified prospectus and include capital gains risk, illiquid investment risk, small capitalization risk, concentration risk, market risk, class risk, interest rate risk, large transaction risk, among others.

There were no significant changes to the investment objectives and strategies that affected the Fund’s overall level of risk during the reporting period. The risks of investing in the Fund and the suitability of the Fund for particular investor’s remains as discussed in the Simplified Prospectus.

Results of Operations

The Fund commenced operations in March of 2015. Recent Developments

While the fundamental investment objective of the Fund did not change, the Fund did begin to implement a new investment strategy at the end of August 2019. Specifically, the Fund now implements the sub-advisor's "risk-managed price momentum equity strategy" – a disciplined, model-driven, rules-based, price momentum (or relative strength) investment strategy. As a price momentum strategy, the Fund invests in Canadian and United States equities that have been performing well over the medium-term relative to other Canadian and United States equities under the premise that equities that have been outperforming (underperforming) will continue to outperform (underperform) in the medium-term future. The risk-managed price momentum equity strategy implemented by the Fund also includes a risk-management "volatility overlay" process whereby Fund exposure to equities is systematically decreased (and exposure to cash is systematically increased) when stock market volatility is excessively high – systematically increasing back to full exposure to equities when volatility is closer to long-term normal.

Beginning in mid-February 2020, the global stock markets entered into an extremely volatile period as fears surrounding COVID-19 began to spread around the world. As COVID-19 achieved formal "Pandemic" status from the World Health Organization, market volatility and losses accelerated with stock markets around the world experiencing "the quickest bear market in history." At the same time, the US stock market Volatility Index (VIX) hit its highest level in recorded history. The speed and brutality of this COVID-19 induced bear market was like nothing seen before in the financial markets. The North American stock markets bottomed in late March and surprising many market observers this bottom not only held, but the North American stock market indexes recovered all of their losses, with most North American indexes finishing up on the year – despite the COVID-19 Pandemic causing the worst economic recession since the Great Depression.

Ironically, despite strong stock selection, the Fund underperformed the S&P/TSX Composite Index for the 2020 calendar due to the Fund's disciplined risk-management processes. Specifically, the sub-advisor's "volatility overlay" reduced the Fund's exposure to equity (commensurately increasing exposure to cash) for the majority of the 2020 year due to the extreme, yet sustained, stock market volatility in the wake of the COVID-19 Pandemic. As a result, given the Fund's low equity exposure, the Fund did not fully participate in the stock market's rebound during the remainder of the calendar year leading to relative underperformance as compared to the S&P/TSX Composite Index. Nevertheless, the volatility overlay did accomplish its primary goal of limiting the Fund's exposure to stock market risk in a time of great uncertainty, and the volatility overlay also significantly reduced the volatility risk of the Fund relative to the S&P/TSX Composite Index.

The sub-advisor of the Fund will continue to implement its "risk-managed price momentum equity strategy" in a disciplined, unemotional, manner allowing the Fund to seek relative strength in whatever segments of the equity markets it finds relative strength. That is, the strategy will, by design, slowly adjust the Fund's holdings towards whatever consistent economic and company factors that stocks prices themselves are reacting to on a relative basis, while maintaining its prudent rules-based risk-management processes.

⁽¹⁾ Management expense ratio ("MER") is based on total expenses less commissions and taxes for the stated period and is expressed as an annualized percentage of daily average net assets during the period. AlphaDelta may, at its discretion and without notice to shareholders, waive or absorb operating expenses. MER includes the waiver or absorption by AlphaDelta of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by AlphaDelta.

⁽²⁾ The portfolio turnover rate indicates how actively the Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate is in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gain in the period. There is not necessarily a relationship between turnover rate and the performance of a portfolio.

Caution Regarding Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts, but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest in and the risks detailed from time to time in the Fund's simplified prospectus. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, management of the Fund does not undertake, and specifically disclaims any intention or obligation to update or revise any forward-looking statements, future events or otherwise, unless required by applicable law.
