Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management:

The Fund is exposed to various types of financial risks that are associated with its investment strategies, financial instruments and market in which it invests. These include credit risk, liquidity risk and market risk which consists of currency risk, interest rate risk and other price risk. For a comprehensive discussion of the risks applicable to the Funds refer to note 8 to the financial statements.

The Fund maintains positions in a variety of non-derivative financial instruments in accordance with its investment strategy. The Fund's investment objective is to provide long-term capital appreciation by investing primarily in equity (and equity equivalent) securities of individual companies, as well as exchange trade funds ("ETFs"), listed on securities exchanges in North America. The Fund may hold a portion of its assets in cash or short-term money market securities (including short-term fixed income ETFs) while seeking investment opportunities or for defensive purposes to reflect adverse market, economic, political or other conditions. The Fund may use derivatives for both hedging and income generation purposes.

Financial risks applicable to the AlphaDelta Tactical Growth Class are discussed in more detail below.

#### (a) Credit risk:

The Fund is not exposed to significant credit risk.

#### (b) Liquidity risk:

The Fund's prospectus provides for the daily creation and cancellation of shares and it is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Fund's investments in listed securities are considered to be readily realizable because they are traded on major Canadian and American stock exchanges. As a result, the Fund is able to liquidate investments in these instruments in due time to meet its liquidity obligations.

The Fund's financial liabilities are due within three months of the Fund's period end.

#### (c) Market risks:

The Fund's strategy for the management of market risk is driven by the Fund's investment objective. The Fund will seek to achieve its investment objective by implementing an investment strategy under which the Fund will concentrate its investments in the sectors or industry groups that the Manager believes to represent attractive quantitative, fundamental and technical characteristics relative to the broad North American equities markets.

The Fund's market risk is managed on a daily basis by the Manager in accordance with the policies and procedures in place. As part of its tactical investment strategy, the Fund may, in certain economic and market environments, undergo relatively quick shifts in industry and section allocations, as well as, overall asset allocation. In addition, the Fund may, on occasion, partially or completely exit individual equities, and the stock market in general, in favor of cash and /or short-term money market securities.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

- (c) Market risks (continued):
  - (i) Interest rate risk:

The Fund is not exposed to significant interest rate risk.

#### (ii) Currency risk:

The Fund may invest up to 100% of its assets in foreign securities. To manage its currency risk the Fund may use over-the-counter forward or swap contracts and /or listed futures contracts to hedge some or all of the foreign currency exposures inherent in the Fund's foreign holdings.

The impact on the assets of a 5% increase or decrease in the foreign exchange rate which the Fund had exposure to, assuming all other variables remain constant, is detailed in the table below:

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

- (c) Market risk (continued):
  - (iii) Other price risk:

Price risk is managed by the Manager by diversifying the portfolio and economically hedging using derivative financial instruments such as over-the-counter forward or swap contracts and/or listed futures contracts to hedge some or all of the foreign currency exposures inherent in the Fund's foreign (mainly U.S.) holdings. Generally, the Fund will not purchase a security of an issuer if the purchase would result in more than 10% of the net asset value of the Fund being invested in the securities of any one issuer.

The Fund's policy for the concentration of its investment portfolio profile is as follows:

Listed equity investments of net assets Unlisted equity investments of net assets Unlisted open-ended investment funds of net assets Up to 100% Up to 10% Up to 10%

There are no restrictions with respect to minimum or maximum sector or industry exposures. Accounting for changes in market value, no single position can be greater than 15% of the net asset value of the Fund.

If the price risk is not in accordance with the investment policy or guidelines of the Fund, then the Manager is obliged to rebalance the portfolio as soon as reasonably possible.

The maximum exposure resulting from financial instruments held by the Fund is determined by the fair value of the financial instruments.

The value of the Fund's investments are affected by both general market factors as well as specific company factors. If the value of the Fund's investments were to increase by 10%, the resulting impact on net assets would be \$1,225,120 (December 31, 2020 - \$1,509,941).

The Manager monitors the concentration of risk for equity based on counterparties and industries. The industry breakdown of investments is disclosed in the Fund's schedule of investment portfolio.

There were no significant concentrations of risk to issuers at June 30, 2021 and December 31, 2020. No exposure to any individual issuer exceeded 15% of the net assets attributable to the holders of redeemable shares either at June 30, 2021 and December 31, 2020.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 2. Fair value of financial instruments:

For a general discussion of the Funds fair value measurements, refer to note 9 to the financial statements.

(a) Fair value hierarchy - financial instruments measured at fair value:

The table below analyses financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognized in the statement of financial position.

All fair value measurements below are recurring.

June 30, 2021

		Level 1	Level 2	Level 3	Total
Assets					
Investments - equities	\$	12,251,200 \$	_	\$ - \$	12,251,200
	\$	12,251,200 \$	_	\$ - \$	12,251,200
Liabilities					
Investments - forward cont	racts\$	- \$	11,395	\$ - \$	11,395
	\$	- \$	11,395	\$ - \$	11,395

#### December 31, 2020

	Level 1	Level 2	Level 3	Total
Assets				
Investments - equities	\$ 15,099,414 \$	- \$	- \$	15,099,414
	\$ 15,099,414 \$	- \$	- \$	15,099,414

The carrying amount of the Fund's net assets attributable to redeemable shares also approximates fair value as they are measured at the redemption amount and are classified as Level 2 in the fair value hierarchy.

The Fund's equity positions are classified as Level 1 because the securities are actively traded and a reliable price is observable.

There were no financial instruments transferred between the three levels during the period ended June 30, 2021 and year ended December 31, 2020.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management:

The Fund is exposed to various types of financial risks that are associated with its investment strategies, financial instruments and market in which it invests. These include credit risk, liquidity risk and market risk which consists of currency risk, interest rate risk and other price risk. For a comprehensive discussion of the risks applicable to the Funds refer to note 8 to the financial statements.

The Fund maintains positions in a variety of derivative and non-derivative financial instruments in accordance with its investment strategy. The Fund's investment objective is to provide shareholders of the Fund with income and longer-term capital appreciation by investing primarily in dividend paying equity securities of Canadian and global companies. The Fund invests primarily in larger capitalization, global, dividend paying equity securities (including securities of unit trusts, real estate investment trusts and depository receipts) and their derivatives. The Fund's investment portfolio comprises listed equities and derivative financial instruments. The Fund is currently using derivatives for hedging purposes only. The Fund may take small positions in other securities, such as convertible securities, high-yield debt securities and derivative instruments, and invest in foreign resource companies listed on major stock exchanges. The Fund may hold a portion of its assets in cash or short-term money market securities while seeking investment opportunities or for defensive purposes to reflect adverse market, economic, political or other conditions.

Financial risks applicable to the AlphaDelta Canadian Growth of Dividend Class are discussed in more detail below.

#### (a) Credit risk:

The Fund is not exposed to significant credit risk.

#### (b) Liquidity risk:

The Fund's prospectus provides for the daily creation and cancellation of shares and it is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Fund's investments in listed securities are considered to be readily realizable because they are traded on major Canadian and American stock exchanges. As a result, the Fund is able to liquidate investments in these instruments in due time to meet its liquidity obligations.

The Fund's financial liabilities are due within three months of the Fund's period end.

#### (c) Market risks:

The Fund's strategy for the management of market risk is driven by the Fund's investment objective.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

#### (c) Market risks (continued):

The Fund's market risk is managed on a daily basis by the Manager in accordance with the policies and procedures in place. The Manager attempts to diversify the Fund's investments by individual holdings, industries and sectors to the extent possible given its Canadian focused mandate. This is accomplished by limiting exposure to individual issuers to 5% of the net asset value of the Fund and limiting foreign exposure to 30% of the total investment portfolio.

#### (i) Currency risk:

The Fund's policy with respect to managing its currency risk is to limit its total foreign currency exposure to less than 30% of the investment portfolio (based on cost).

The impact on the assets of a 5% increase or decrease in the foreign exchange rate which the Fund has exposure to, assuming all other variables remain constant, is detailed in the table below.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

- (c) Market risks (continued):
  - (ii) Other price risk:

Price risk is managed by the Manager by diversifying the portfolio and economically hedging using derivative financial instruments such as options or futures contracts.

The Fund's policy for the concentration of its investment portfolio profile is as follows:

Listed equity investments
Unlisted open-ended investment funds

up to 100% of net assets up to 10% of net assets

If the price risk is not in accordance with the investment policy or guidelines of the Fund, then the Manager is obliged to rebalance the portfolio as soon as reasonably possible.

The maximum exposure resulting from financial instruments held by the Fund is determined by the fair value of the financial instruments.

The value of the Fund's investments are affected by both general market factors as well as specific company factors. If the value of the Fund's investments were to increase by 10%, the resulting impact on net assets would be \$340,268 (December 31, 2020 - \$60,723).

The Manager monitors the concentration of risk for equity based on counterparties and industries. The industry breakdown of investments is disclosed in the Fund's Schedule of Investment Portfolio.

There were no significant concentrations of risk to issuers at June 30, 2021 and December 31, 2020. No exposure to any individual issuer exceeded 10% of the net assets attributable to the holders of redeemable shares at June 30, 2021 and December 31, 2020.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 2. Fair value of financial instruments:

For a general discussion of the Funds fair value measurements, refer to note 9 to the financial statements.

(a) Fair value hierarchy - financial instruments measured at fair value:

The table below analyses financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognized in the statement of financial position.

All fair value measurements below are recurring.

June 30, 2021

	Level 1	Level 2	Level 3	Total
Assets				
Investments - equities	\$ 3,402,675	- \$	- \$	3,402,675
	\$ 3,402,675	- \$	- \$	3,402,675

#### December 31, 2020

	Level 1	Level 2	Level 3	Total
Assets				
Investments - equities	\$ 607,231	\$ - \$	- \$	607,231
	\$ 607,231	\$ - \$	- \$	607,231

The carrying amount of the Fund's net assets attributable to redeemable shares also approximates fair value as they are measured at the redemption amount and are classified as Level 2 in the fair value hierarchy.

The Fund's equity positions are classified as Level 1 because the securities are actively traded and a reliable price is observable.

There were no financial instruments transferred between the three levels during the period ended June 30, 2021 and year ended December 31, 2020.

There are no foreign exchange forward contracts held by the fund as at June 30, 2021 December 31, 2020.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management:

The Fund is exposed to various types of financial risks that are associated with its investment strategies, financial instruments and market in which it invests. These include credit risk, liquidity risk and market risk which consists of currency risk, interest rate risk and other price risk. For a comprehensive discussion of the risks applicable to the Funds refer to note 8 to the financial statements.

The Fund maintains positions in a variety of derivative and non-derivative financial instruments in accordance with its investment strategy. The Fund's investment objective is to provide shareholders of the Fund with income and longer-term capital appreciation by investing primarily in dividend paying equity securities of companies around the world. The Fund invests primarily in larger capitalization, global, dividend paying equity securities (including securities of unit trusts, real estate investment trust and depositary receipts) and their derivatives. The Fund's investment portfolio comprises listed equities and derivative financial instruments. The Fund is currently using derivatives for hedging purposes only. The Fund may take small positions in other securities, such as convertible securities, high-yield debt securities and derivative instruments, and invest in foreign resource companies listed on major stock exchanges. The Fund may hold a portion of its assets in cash or short-term money market securities while seeking investment opportunities or for defensive purposes to reflect adverse market, economic, political or other conditions.

Financial risks applicable to the AlphaDelta Growth of Dividend Class are discussed in more detail below.

#### (a) Credit risk:

The derivative strategies implemented by the Fund are consistent with section 2.7 of National Instrument 81-102 requiring that any option, debt-like security, swap or contract is given a designated rating where if the credit rating of that option, debt-like security, swap or contract falls below that designated rating, the Fund must take the necessary steps to close out its position. The market value exposure of the Fund to its specified derivative positions must not exceed 10% of the net asset value of the fund. The Fund mitigates exposure to counterparty risk by using counterparties with a minimum credit rating from S&P Global Rating of A.

#### (b) Liquidity risk:

The Fund's prospectus provides for the daily creation and cancellation of shares and it is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Fund's investments in listed securities are considered to be readily realizable because they are traded on major Global stock exchanges. As a result, the Fund is able to liquidate investments in these instruments in due time to meet its liquidity obligations.

The Fund's financial liabilities are due within three months of the Fund's period end.

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

#### (c) Market risks:

The Fund's strategy for the management of market risk is driven by the Fund's investment objective.

The Fund's market risk is managed on a daily basis by the Manager in accordance with the policies and procedures in place. The Manager attempts to diversify the Fund's investments by individual holdings, industries, sectors and countries. This is accomplished by limiting exposure to individual issuers to 5%. The Fund will generally attempt to remain close to fully invested in dividend paying securities regardless of market conditions to continue to generate distribution income for shareholders, opting instead to hedge market risk in adverse market conditions with equity index options or other derivatives.

#### (i) Interest rate risk:

The Fund is not exposed to significant interest rate risk.

#### (ii) Currency risk:

To manage its currency risk the Fund may use over-the-counter forward or swap contracts and /or listed futures contracts to hedge some or all of the foreign currency exposure inherent in the Fund's foreign holdings.

The impact on the assets of a 5% increase or decrease in the foreign exchange rate which the Fund has exposure to, and the notional amounts of foreign forward contracts, assuming all other variables remain constant, is detailed in the table below:

			_		•	if CAD strengthed by 5% in relation	
	-		Exposure			currencies

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

- (c) Market risks (continued):
  - (ii) Currency risk (continued):

			Е	Exposure				weakened by	y 5°	D strengther % in relation rrencies		r
Currency		Monetary	N	on-Moneta	ry	Total	-	Monetary	No	on-Monetary	Total	_
December 31, 2020												
U.S. Dollar	\$_	(6,383,588)	\$	6,872,027	\$	488,439	\$	(319,179)	\$	343,601 \$	24,422	2_
	\$	(6,383,588)	\$	6,872,027	\$	488,439	\$	(319,179)	\$	343,601 \$	24,422	2
% of Net Assets Attributable to Holders												
of Redeemable Shares		(68.0)		73.2		5.2		(3.4)		3.7	0.3	3

The Fund enters into foreign exchange forward contracts to hedge its foreign currency exposures. Figures shown above are net of notional value of the forward contract at the period-end spot rate less the CA\$ value of the US\$ cash balance at the period-end, as applicable.

As at June 30, 2021, the Fund had one outstanding currency contracts to sell US\$6,700,000 prior to July 9, 2021 at a rate of CA\$1.24046 per US\$.

#### (iii) Other price risk:

Price risk is managed by the Manager by diversifying the portfolio and economically hedging using derivative financial instruments such as options or futures contracts.

The Fund's policy for the concentration of its investment portfolio profile is as follows:

Listed equity investments	up to 100% of net assets
Unlisted equity investments	up to 10% of net assets
Unlisted open-ended investment funds	up to 10% of net assets

If the price risk is not in accordance with the investment policy or guidelines of the Fund, then the Manager is obliged to rebalance the portfolio as soon as reasonably possible.

The maximum exposure resulting from financial instruments held by the Fund is determined by the fair value of the financial instruments.

The value of the Fund's investments are affected by both general market factors as well as specific company factors. If the value of the Fund's investments were to increase by 10%, the resulting impact on net assets would be \$1,180,974 (December 31, 2020 - \$912,627).

Discussion of Financial Instruments and Risk Management

June 30, 2021 (Unaudited)

#### 1. Financial risk management (continued):

#### (c) Market risk (continued):

#### (iii) Other price risk (continued):

The Manager monitors the concentration of risk for equity based on counterparties and industries. The industry breakdown of investments is disclosed in the Fund's Schedule of Investment Portfolio.

There were no significant concentrations of risk to issuers at June 30, 2021 and December 31, 2020.

#### 2. Fair value of financial instruments:

For a general discussion of the Funds fair value measurements, refer to note 9 to the financial statements.

(a) Fair value hierarchy - financial instruments measured at fair value:

The table below analyses financial instruments measured at fair value at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognized in the statement of financial position.

All fair value measurements below are recurring.

June 30, 2021

#### 2. Fair value of financial instruments (continued):

(a) Fair value hierarchy - financial instruments measured at fair value (continued):

The carrying amount of the Fund's net assets attributable to redeemable shares also approximates fair value as they are measured at the redemption amount and are classified as Level 2 in the fair value hierarchy.

The Fund's equity positions are classified as Level 1 because the securities are actively traded and a reliable price is observable. The Fund enters into foreign exchange forward contracts to reduce its foreign currency exposure. The forward contracts are classified as Level 2 because there is no active market where prices are quoted. The forward contracts are measured at fair value based on the difference between the US dollar close price and the directly observable forward contract price.

Foreign exchange forward contracts as at June 30, 2021										
Cur	rency to be delivered	d	Currency to be received							
		Fair value		Fair value		_				
		as at		as at						
		June 30,		June 30,	Contract					
Settlement	Face value	2021	Face value	2021	price	Depreciation

### 3. Involvement with structured entities:

The table below describes the types of structured entities that in which the Fund holds interest.

Entity	Nature and purpose	Interest held by the Fund
Investment fund	To manage assets on behalf of third party investors and generate fees for the investment manager.  These vehicles are financed through the issue of units to investors.	Investment in units issued by the underlying investment fund.

The table below sets out interests held by the Fund in structured entities. The maximum exposure to loss is the carrying amount of the investment in the underlying funds held.

The Fund did not hold interests in other structured entities as at June 30, 2021

December 31, 2020					
		Number of investee funds	 tal net assets		Carrying amount

### 1. Reporting entity:

Qwest Funds Corp. (the "Corporation") is a mutual fund corporation incorporated under the laws of Canada on March 8, 2006. The address of the Corporation's registered office is Four Bentall Centre, Suite 732, 1055 Dunsmuir Street, Vancouver, British Columbia. The authorized capital of the Corporation consists of an unlimited number of Class A shares, Class B shares and special shares. Currently, there are four classes of special shares that are in issue. Each special share is managed as a separate fund within the Corporation (the "Funds"). These Funds are as follows:

Name of the Fund	Date of inception
AlphaDelta Tactical Growth Class	March 31, 2016
AlphaDelta Canadian Growth of Dividend Income Class	August 30, 2018
AlphaDelta Growth of Dividend Income Class	February 19, 2015

The Corporation may offer additional classes of special shares in the future. These financial statements present the financial information of the Funds as separate reporting entities. If a class of the Corporation cannot satisfy its obligations, the other classes may be required to satisfy them using assets attributable to those classes. The Manager believes the risk of such cross-liability is remote. The Corporation's ultimate controlling party is Qwest Investment Management Corp. ("QIM") which owns 51% of Class A voting shares and 100% of Class B voting shares of the Corporation.

The Corporation appointed Qwest Investment Fund Management Ltd. (the "Manager"), whose ultimate parent is QIM, as the manager of the Funds. The Manager is responsible for providing portfolio management and administrative services to the Funds. The Manager is authorized to delegate its investment advisory duties to sub-advisors. The Manager has entered into an agreement with AlphaDelta Management Corp. ("ADM"), pursuant to which ADM will assist the Manager in identifying, screening and selecting sub-advisors. ADM shares common directors with the Manager. The Manager has engaged the following sub-advisors for the Funds:

Name of the Fund	Sub-Advisor
AlphaDelta Tactical Growth Class	Aventine Management Group Inc.
AlphaDelta Canadian Growth of Dividend Income Class	Iris Asset Management Ltd.
AlphaDelta Growth of Dividend Income Class	SciVest Capital Management Inc.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 2. Basis of preparation:

### (a) Statement of compliance:

These interim financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") as published by the International Accounting Standards Board ("IASB"), as applicable to the preparation of interim financial statements including International Accounting Standards ("IAS") 34, Interim Financial Statements. These financial statements were authorized for issue by the Board of Directors of the Corporation, on August 18, 2021.

### (b) Basis of measurement:

These interim financial statements have been prepared on a historical cost basis except for investments in securities and forward contracts, which are measured at fair value.

#### (c) Functional and presentation currency:

These financial statements are presented in Canadian dollars, which is the Funds' functional currency.

### (d) Use of estimates and judgment:

The preparation of financial statements in conformity with IFRS requires the Manager to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized in the period in which the estimates are revised and in any future period affected.

### 3. Significant accounting policies:

The accounting policies set out below have been applied consistently to all periods as presented in these financial statements.

### (a) Financial instruments:

#### (i) Recognition and measurement:

Financial instruments are required to be classified into one of the following categories: amortized cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss ("FVTPL"). All financial instruments are measured at fair value on initial recognition. Measurement in subsequent periods depends on the classification of the financial instrument. Transaction costs are included in the initial carrying amount of financial instruments except for financial instruments classified as FVTPL in which case transaction costs are expensed as incurred.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 3. Significant accounting policies (continued):

- (a) Financial instruments (continued):
  - (i) Recognition and measurement (continued):

Financial assets and financial liabilities are recognized initially on the trade date, which is the date on which the Funds become a party to the contractual provisions of the instrument. The Funds derecognize a financial liability when its contractual obligations are discharged, cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position only when the Funds have a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

A financial asset is measured at amortized cost if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal interest on the principal amount outstanding.

A financial asset is measured at FVOCI if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal interest on the principal amount outstanding.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. On initial recognition the Funds may irrevocably elect to measure financial assets that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL when doing so results in more relevant information.

Financial assets are not reclassified subsequent to their initial recognition, unless the Fund changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

The Fund has not classified any of its financial assets as FVOCI.

A financial liability is generally measured at amortized cost, with exceptions that may allow for classification as FVTPL. These exceptions include financial liabilities that are mandatorily measured at fair value through profit or loss, such as derivatives liabilities. The Fund may also, at initial recognition, irrevocably designate a financial liability as measured at FVTPL when doing so results in more relevant information.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 3. Significant accounting policies (continued):

- (a) Financial instruments (continued):
  - (ii) Fair value through profit and loss:

Financial instruments classified as FVTPL are subsequently measured at fair value at each reporting period with changes in fair value recognized in the statement of comprehensive income in the period in which they occur. The Funds' investments in securities and forward contracts are classified as FVTPL.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly marketable securities) are based on quoted market prices at the close of trading on the reporting date. The Funds use the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. The Funds' policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. Valuation techniques also include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and others commonly used by market participants and which make the maximum use of observable inputs. Should the value of the financial asset or liability, in the opinion of the Manager, be inaccurate, unreliable or not readily available, the fair value is estimated on the basis of the most recently reported information of a similar financial asset or liability.

#### (iii) Amortized cost:

Financial assets and financial liabilities classified as amortized cost are recognized initially at fair value plus any directly attributable transaction costs. Subsequent measurement is at amortized cost using the effective interest method, less any impairment losses. The Funds classify cash, receivables from investments sold, dividends receivable, subscriptions receivable, due from related parties, prepaid expenses, distribution payable, management fees payable, redemptions payable, payables from investments purchased and accounts payable and accrued liabilities as amortized cost.

The effective interest method is a method of calculating the amortized cost of a financial asset or liability and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial asset or liability, or where appropriate, a shorter period.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 3. Significant accounting policies (continued):

#### (b) Redeemable shares:

The Funds classify financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. The Funds have designated the redeemable shares as financial liabilities at FVTPL because they are managed and their performance evaluated on a fair value basis. The redeemable shares provide investors with the right to require redemption, subject to available liquidity, for cash at a share price based on the Funds' valuation policies at each redemption date.

### (c) Income taxes:

The Corporation qualifies as a mutual fund corporation as defined in the Income Tax Act (Canada). A mutual fund corporation is subject to a special 38-1/3% tax on taxable dividends received from corporations' resident in Canada and to tax at a normal corporate rate on other income and net taxable realized capital gains for the period. The special 38-1/3% tax is refundable at the rate of \$1 for every \$2.61 of ordinary dividends paid. All the tax on net taxable realized capital gains is refundable on a formula basis when shares are redeemed or capital gains dividends are paid. As a result of these refund mechanisms, the Funds are in effect not taxable with respect to dividends received from corporations resident in Canada and net taxable realized capital gains. The Funds are not taxable as all the Funds' net income for tax purposes and sufficient net capital gains realized in the period, will be distributed to shareholders such that no income tax is payable by the Funds with respect to taxable realized capital gains and dividends received from corporation's resident in Canada. Therefore, the Funds do not recognize current or deferred income taxes with respect to these types of income.

The conversion of shares between two classes of a mutual fund corporation (including Qwest Funds Corp.) is treated as a disposition of shares at their fair market value.

The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the statement of comprehensive income.

#### (d) Foreign exchange:

The financial statements of the Funds are denominated in Canadian dollars. Foreign denominated investments and other foreign denominated assets and liabilities are translated into Canadian dollars using the exchange rates prevailing on each valuation date. Purchases and sales of investments, as well as income and expense transactions denominated in foreign currencies, are translated using exchange rates prevailing on the date of the transaction.

Foreign currency gains and losses related to cash are presented as foreign exchange gain (loss) on cash and those relating to other financial assets and liabilities are presented within net realized gain on sales of investments and change in unrealized (depreciation) appreciation of investments in the statement of comprehensive income.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 3. Significant accounting policies (continued):

#### (e) Income recognition:

Interest income is recognized on an accrual basis using the effective interest method. Dividend income is recognized on the date that the right to receive payment is established, which for quoted equity securities is usually the ex-dividend date. Portfolio transactions are recorded on the trade date. Realized gains and losses arising from the sale of investments are determined on the average cost basis of the respective investments.

(f) Increase (decrease) in net assets attributable to holders of redeemable shares per share:

The increase (decrease) in net assets attributable to holders of redeemable shares per share is calculated by dividing the increase (decrease) in net assets attributable to holders of redeemable shares by the weighted average number of shares outstanding during the period.

### 4. Related party transactions:

### (a) Management fees:

Under the investment management agreement, the Manager receives a management fee based on the net asset value attributable to holders of redeemable shares on each valuation day at the following annualized rates:

Fund Name	Management fee
AlphaDelta Tactical Growth Class:	
Series A	2.50%
Series F	1.50%
Series I	0.75%
AlphaDelta Canadian Growth of Dividend Income Class:	
Series A	1.70%

### 6. Commitments:

If another class of the Corporation cannot satisfy its obligations, the other classes, may be required to satisfy those obligations using assets attributable to those classes.

### 7. Brokerage commissions and soft dollars:

The Manager may select brokers who charge a commission in excess of that charged by other brokers ("soft dollars") if they determine in good faith that the commission is reasonable in relation to the order execution and research services utilized. Brokerage commissions paid with respect to security transactions for the period ended June 30 include the following:

June 30,	June 30,
2021	2020
59,538	18,949
1,990	395
2,233	4,020
	2021 59,538 1,990

There were no ascertainable soft dollar amounts received during the period (June 30, 2020 - nil).

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 8. Financial risk management:

The following is a general discussion of the financial risks to which the Funds are exposed. Refer to the Discussion of Financial Instruments and Risk Management following each Fund's financial statements for information specific to the respective Fund.

### (a) Risk management framework:

The Manager has been given discretionary authority to manage the assets in line with the Funds' investment objectives. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Manager on a daily basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

#### (b) Credit risk:

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Funds, resulting in a financial loss to the Funds. It arises principally from derivative financial assets, cash and cash equivalents, and other receivables due to the Funds. The carrying value of these financial instruments as recorded in the statements of financial position reflects the Funds' maximum exposure to credit risk.

The Funds' policy over credit risk is to minimize its exposure to counterparties with perceived higher risk of default by dealing only with reputable counterparties.

Credit risk is monitored on a daily and monthly basis by the Manager in accordance with the policies and procedures in place. The Funds' trade and investment holding reports are distributed to the Manager for review on a daily basis. Irregularities or items flagged for non-compliance are flagged for further investigation. If the credit risk is not in accordance with the investment policy or guidelines of the Funds, then the Manager is obliged to rebalance the portfolio as soon as reasonably possible.

The Funds' activities may give rise to settlement risk. Settlement risk is the risk of loss due to the failure of an entity to honor its obligations to deliver cash, securities, or other assets as contractually agreed. For the majority of transactions, the Funds mitigate this risk by conducting settlements through a broker to ensure that a trade is settled only when both parties have fulfilled their contractual settlement obligations.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 8. Financial risk management (continued):

### (c) Liquidity risk:

Liquidity risk is the risk that the Funds will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Funds' policy and the Manager's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking damage to the Funds' reputation.

### (d) Market risk:

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and equity prices will affect the Funds' income or the fair value of its holdings of financial instruments.

#### (i) Interest rate risk:

Interest rate risk is the risk that the fair value of future cash flows of financial instruments will fluctuate as a result of changes in market interest rates. The substantial majority of the Funds' financial assets and liabilities are non-interest bearing. As a result, the Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

Any excess cash and cash equivalents are invested at short-term market interest rates.

#### (ii) Currency risk:

Currency risk is the risk that the value of financial instruments denominated in currencies other than the functional currency of the Funds will fluctuate due to changes in foreign exchange rates.

The Funds' currency risk is managed on a daily basis by the Manager in accordance with the policies and procedures in place. The Funds' trade and investment holding reports are distributed to the Manager for review on a daily basis. Foreign currency transactions and daily weighted holdings are assessed to ensure compliance with the Funds' policies.

### (iii) Other price risk:

Other price risk is the risk that the fair value of the financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment or its issuer or factors affecting all instruments traded in the market.

Notes to Financial Statements

June 30, 2021 (Unaudited)

### 8. Financial risk management (continued):

### (d) Market risk (continued):

#### (iii) Other price risk (continued):

The internal procedures require the Manager to manage price risk on a daily basis. The Funds' trade and investment holding reports are distributed to the Manager for review on a daily basis.

Unexpected volatility or illiquidity in the markets in which positions are held, including due to legal, political, regulatory, economic or other developments, such as public health emergencies, including an epidemic or pandemic, natural disasters, war and related geopolitical risks, may impair the Portfolio Manager's ability to carry out the objectives of the Portfolios or cause the Portfolios to incur losses. The recent spread of the coronavirus disease (also known as COVID-19) has caused a significant slowdown in the global economy and volatility in global financial markets. These developments are constantly evolving and the duration and impact of COVID-19 pandemic is highly uncertain and may have a material impact on the future performance of the Funds. In the face of the current environment of heightened uncertainty and market volatility, the Manager continues to closely monitor its impact on the Funds' risk exposure from the portfolio holdings.

#### 9. Fair value of financial instruments:

#### (a) Valuation models:

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Funds determine fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Funds measure fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1 inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2 inputs other than quoted prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 inputs that are unobservable.

Notes to Financial Statements

### 9. Fair value of financial instruments:

#### (a) Valuation models (continued):

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Funds use widely recognized valuation models for determining the fair value of common and more simple financial instruments that use only observable market data and require little management judgment and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple OTC derivatives such as interest rate swaps. The availability of observable market prices and model inputs reduces the need for management judgment and estimation and reduces the uncertainty associated with the determination of fair values. The availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties; to the extent that the Funds believe that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Funds and the counterparties where appropriate.

Model inputs and values are calibrated against historical data and published forecasts and, when possible, against current or recent observed transactions and broker quotes. This calibration process is inherently subjective and it yields ranges of possible inputs and estimates of fair value, and management judgment is required to select the most appropriate point in the range.

#### (b) Valuation framework:

The Manager has engaged SGGG Fund Services Inc. ("SGGG") to value the net assets of the Funds on a daily basis. SGGG obtains pricing for Level 1 financial instruments from a third party pricing vendor. The Manager is responsible for performing the fair value measurements of financial instruments in Level 2 and Level 3.

The Funds have an established control framework with respect to the measurement of fair values. This framework includes an investment committee, which is independent of front office management and reports to the Board of Directors, who have overall responsibility for fair value measurements.

### 9. Fair value of financial instruments:

(b) Valuation framework (continued):

Specific controls include:

- · verification of observable pricing inputs;
- re-performance of model valuations;
- a review and approval process for new models and changes to such models;
- calibration and back-testing of models against observed market transactions;
- · analysis and investigation of significant daily valuation movements; and
- review of unobservable inputs and valuation adjustments.
- (c) Financial instruments not measured at fair value:

The carrying value of cash, receivable from investments sold, dividends receivable, subscriptions receivable, accounts receivable, due from related parties, distribution payable, management fees payable, redemption payable, payables from investments purchased and accounts payable and accrued liabilities approximates their fair value given their short-term nature. These financial instruments are classified as Level 2 in the fair value hierarchy because while prices are available, there is no active market for these instruments.

### 10. Capital management:

The redeemable shares issued by the Funds represent capital of the Funds. The Funds' objectives in managing the redeemable shares are to ensure a stable base to maximize returns to all investors, and to manage liquidity risk arising from redemptions.

The Funds are not subject to any internally or externally imposed restrictions on its capital other than certain minimum subscriptions. The minimum initial investment for Series A, Series A1, Series F and Series I is \$1,000, per Series. The minimum initial investment for Series G and Series H is \$25,000, per Series.

### 11. Income taxes:

The Corporation's available tax losses, both capital and non-capital, are determined at the corporate and not the individual class level. As at December 31, 2020, the Corporation had unrecognized non-capital losses of approximately \$3,438,510 (December 31, 2019 - \$3,438,510) available for utilization against taxable income in future years. The Corporation had unrecognized capital losses available at December 31, 2020 of approximately \$7,688,750 (December 31, 2019 - \$7,688,750).

The non-capital losses expire as follows:

2038	\$ 190,365
2037	-
2036	525,370
2035	524,234
2034	389,415
2033	722,898
2032	1,086,228
	\$ 3,438,510
